### days two + three: **Drawing LABS**

Friday, February 22<sup>nd</sup> + Saturday, February 23<sup>rd</sup> 10am-2pm

For years we have been told that there is a right way to draw: correct perspectives, full tonal range, and appropriate ways to make marks. It's time to throw all of that away and approach one of the oldest art disciplines with fresh eyes. How would we draw if there were no rules and no limitations? During the Drawing Labs we will explore experimental approaches to mark making, non-traditional materials, tools and surfaces, as well as the most unique source of inspiration, our own imaginations. This workshop is about discovering new and unconventional ways to expand and challenge our drawing vocabulary, both in regards to the way we see existing forms and the way we invent them abstractly.

Also we would love to include exploring a connect drawing with new media in finding ways to bridge the two because connections can and should be made between drawing and all media.
